Google Data Analytics Certification ID : 184429747

OBJECTIVE

MBA (IT) graduate with 2.5 years of experience in data-driven operations, transitioning into Security Operations (SOC). Passionate about threat detection, network traffic analysis, and incident response. Skilled in analyzing security logs, identifying vulnerabilities via Nmap/Wireshark, and automating security workflows with Python. Dedicated to proactive threat hunting and maintaining robust security posture

TARGET ROLE

- **SOC Analyst / Security Operations Analyst :-** Aspiring SOC Analyst with a strong foundation in network security and threat detection. Proven ability to analyze complex logs, identify security anomalies, and automate incident response workflows using Python to enhance operational efficiency.

SKILLS

- 1. Technical Security: Network Auditing, Vulnerability Management, Python (for task automation), SQL (for audit logs).
- 2. Systems & Infrastructure: Kali Linux, Windows, Virtualization (VirtualBox), Database Management.
- 3. Cybersecurity: Network Sniffing (Wireshark), Log Auditing (journalctl), Vulnerability Scanning (Nmap).
- Core SOC: Incident Response, SIEM (concept knowledge), Log Analysis, Network Traffic Analysis.
- Concepts: MITRE ATT&CK Framework, Cyber Kill Chain, Threat Intelligence
- Tools: Wireshark, Nmap, Python, Kali Linux, SQL

EXPERIENCE

1 November 2022 - 10 July 2025
BPO CUSTOMER CARE EXECUTIVE

We win limited

- **Compliance & Data Privacy :** Ensured 100% compliance with data privacy policies while managing sensitive customer information and maintaining zero-error database records.
- **Operational Support & Performance :** Managed high-volume customer queries and SLA metrics, focusing on secure database management protocols.
- Provided technical troubleshooting and proactive performance monitoring to consistently exceed quality scores and reduce escalation rates.

November 2025 - May 2026
Data analyst / Freelancer

Vedanshi Pixel India

- **Data Integrity & Compliance :** Ensured 100% data integrity and accuracy by cleaning and auditing company datasets using advanced SQL queries.
- **Process Optimization & Reporting :** Developed interactive dashboards to visualize key operational performance and security metrics, enabling data-driven decision-making .
- Collaborated with cross-functional teams to identify operational trends and standardized documentation processes to improve audit readiness.

1 July 2025 - 30 April 2026
Cybersecurity analyst

IICEA PVT. LTD.

- **Vulnerability Assessment & Mitigation:** Conducted comprehensive security assessments for websites and web applications, proactively identifying and resolving critical vulnerabilities to strengthen the organization's digital security posture.
- **Threat Monitoring & Incident Response:** Monitored servers and digital assets for suspicious activities, assisting in malware detection, incident response, and implementing security best practices to safeguard company infrastructure.

- **Security Auditing & Collaboration:** Performed periodic security audits and collaborated with the development team to promote secure coding practices, ensuring high standards of security and disaster recovery planning.

PROJECTS

- **1. GitHub Portfolio & Technical Repositories**

Live Portfolio: sahil-241.github.io/sahil-portfolio/

- A comprehensive dashboard showcasing data analysis projects and technical expertise.
- **Cyber-Toolbox-50 (Security Automation):** github.com/Sahil-241/Cyber-Toolbox-50
- Repository focused on security reconnaissance, log auditing, and automation scripts.
- **Technical Portfolio Hub:** github.com/Sahil-241/Technical-Portfolio-Hub
- Repository for C++ applications and Network Traffic Analysis deep-dives.

- **2. Security Incident Detection & Automation Lab**

Description: Developed a custom security toolkit to automate log analysis and vulnerability scanning.

Key Tasks: Used Wireshark to perform packet capture and identify malicious network signatures.

- Leveraged Python scripts to parse and audit system logs, effectively reducing investigation time.
- Conducted vulnerability assessments using Nmap to identify and document potential entry points in a simulated environment.

- **3. Network Security & Vulnerability Analysis Lab**

- **Description :** Used Wireshark and Kali Linux to capture and monitor live network traffic. Analyzed system logs and network data to detect unusual activity and security vulnerabilities. Conducted network traffic analysis and system log audits to map vulnerabilities, providing actionable reports for risk mitigation
- **Tech Stack:** Wireshark, Kali Linux, journalctl, VirtualBox , Nmap, Vulnerability Scanning, Log Auditing, Risk Assessment Reporting.

- **4. Hardware Hacking & HID Security Research**

- **Description:** Engineered custom HID (Human Interface Device) tools using DigiSpark (ATtiny85) and Arduino microcontrollers. Analyzed and tested HID protocols to understand system vulnerabilities in a controlled, educational environment.
- **Tech Stack:** DigiSpark (ATtiny85), Arduino, Soldering tools.

EDUCATION

- **Govt. Degree College Bhoranj (Tarkwari)**
2021
Bachelor of ARTS
- **Maharaja Agrasen Himalayan Garhwal University Uttrakhand**
2023
MBA in IT

ACHIEVEMENTS & AWARDS

- Google Data Analytics Professional Certification: Gained expertise in data-driven operations, automated security-related workflows, and established zero-error record management practices to ensure data integrity.

INTERESTS

- Threat Intelligence & Hunting: Actively tracking emerging cyber threats and analyzing attack vectors.
- Security Automation: Developing Python scripts to automate log analysis and incident response.
- Network & Hardware Security: Researching vulnerabilities in HID protocols and network infrastructure.
- Compliance Frameworks: Staying updated on security standards and best practices for risk mitigation.

ADDITIONAL INFORMATION

Work Preference: Remote-first collaboration with proficiency in cross-functional communication and virtual team management.

Availability: Immediate joiner, flexible to adapt to 24/7 rotational shifts essential for SOC operations
