Google Data Analytics Certification ID : 184429747

OBJECTIVE

Dedicated MBA (IT) graduate with 2.5 years of experience in high-volume customer service, now pivoting to a technical role. Proven ability to handle complex data, troubleshoot system issues, and automate repetitive tasks. Committed to leveraging strong analytical skills and a passion for cybersecurity to drive business efficiency and secure infrastructure within a growth-oriented IT organization

TARGET ROLE

- **Data Analyst:** Focus on cleaning raw datasets and using SQL/Power BI to track performance metrics. I can help in streamlining reporting processes, identifying operational trends, and presenting data in a clear format to support day-to-day business decisions.
- **Cyber Security Analyst:** Focus on monitoring network activity and analyzing system logs to detect unusual patterns. I can contribute by maintaining security hygiene, ensuring compliance with data protocols, and assisting in identifying potential vulnerabilities in the internal network infrastructure.

SKILLS

- Programming & Data: Python, C, C++, SQL, Power BI, Advanced Excel
- Cybersecurity: Network Sniffing (Wireshark), Log Auditing (journalctl), Vulnerability Scanning (Nmap).
- Systems & Infrastructure: Linux (Kali, Parrot OS), Windows, Virtualization (VirtualBox), Database Management.
- Hardware/Networking: HID Hardware Payloads, TCP/IP, DNS, SSH.
- Version Control: Using Git and GitHub to manage and organize project code.
- Logical Reasoning: Implementing complex algorithms and data structures using C++.
- Systems Debugging: Troubleshooting OS-level configurations and analyzing system logs in Linux and VirtualBox.
- Hardware Automation: Programming microcontrollers like ATtiny85 for custom hardware tasks.

CERTIFICATIONS & TRAINING

- **Certified Ethical Hacker (CEH)** – In Progress, IICE Computer Education, Shimla. Expected completion: October 2026.

EXPERIENCE

1 November 2022 - 10 July 2025

We win limited

BPO CUSTOMER CARE EXECUTIVE

- Managed high-volume customer queries and SLA metrics while ensuring secure database management.
- **Data Integrity & Security:** Ensured 100% compliance with data privacy policies while handling sensitive customer information, maintaining a zero-error record in database entries.
- **Technical Troubleshooting:** Provided first-level technical support for product-related queries, diagnosing issues accurately to reduce escalation rates.

- **KPI Achievement:** Consistently met and exceeded daily/monthly performance targets for AHT and quality scores through proactive self-monitoring and feedback implementation.
- **Quality Assurance :** Performed regular self-audits of call logs and customer documentation to ensure accuracy and adherence to organizational standards.
- **Operational Excellence:** Played a key role in team meetings to share best practices, which helped in streamlining workflows and improving overall team response times

November 2025 - May 2026

Vedanshi Pixel India

Data analyst / Freelancer

- Extracted and cleaned raw datasets from company databases using advanced SQL queries to ensure data integrity and accuracy.
- Developed interactive Power BI dashboards to visualize key operational performance metrics, enabling data-driven decision-making.
- Collaborated with cross-functional teams to identify data trends and provide actionable insights to improve business processes.
- **Operational Reporting & Documentation:** Developed comprehensive weekly performance reports by consolidating multi-source data, ensuring management had accurate visibility into operational efficiency.

ACHIEVEMENTS & AWARDS

- Google Data Analytics Professional Certification :-
- Continuous Improvement: Proactively identifying operational bottlenecks and implementing automated solutions to enhance team productivity.
- Technical Adaptability: Quickly learning and applying new software, security tools, and programming languages to meet project requirements.
- Analytical Rigor: Maintaining high accuracy and attention to detail when managing complex datasets and troubleshooting technical issues.
- Security Mindset: Consistently applying best practices for data privacy and network security in all technical implementations.

PROJECTS

- **Data Analytics Portfolio & Dashboards**

Description : Built a Call Center Dashboard using SQL and Power BI to track agent performance and SLAs.

- Conducted E-commerce Sales Analysis using SQL to model customer purchase data.

Tech Stack: SQL, Power BI, Advanced Excel.

Key Highlights: Built a dedicated Call Center Dashboard to monitor agent performance and track Service Level Agreements (SLAs). Analyzed e-commerce sales and employee compensation datasets to generate actionable business insights

- **Network Traffic Analysis Lab**

Description : Used Wireshark and Kali Linux to capture and monitor live network traffic.

- Analyzed system logs (journalctl) to detect unusual activity.
- Checked network data to find security vulnerabilities.

Tech Stack: Wireshark, Kali Linux, journalctl, VirtualBox.

Key Highlights: Set up a controlled environment to capture and study live network traffic. Analyzed system logs to detect unusual behavior and identified potential network security vulnerabilities .

- **Console-Based Games Development (C++)**

Description: Designed and implemented interactive console-based applications using C++ to demonstrate core programming logic and data structure implementation.

Developed a "Tic-Tac-Toe" game and a "Number Guessing" application, focusing on user interaction, conditional statements, and efficient code flow.

Tech Stack: C++, Visual Studio/Code Editor.

Key Highlights: Designed interactive applications like "Tic-Tac-Toe" and "Number Guessing" to master programming logic and data structures. Focused on creating efficient, user-friendly, and interactive code flow.

- **Hardware Hacking & HID Automation (DIY Electronics)**

Description: Engineered custom HID (Human Interface Device) tools using DigiSpark (ATtiny85) and Arduino microcontrollers.

Analyzed and tested HID protocols to understand system vulnerabilities in a controlled, educational environment.

Tech Stack: DigiSpark (ATtiny85), Arduino, Soldering tools.

Key Highlights: Engineered custom hardware tools for HID automation and testing. Gained practical experience in soldering, hardware assembly, and analyzing HID protocols for security research.

- **Personal Professional Portfolio Website**

Description: Developed and deployed a responsive personal portfolio website to showcase technical projects, certifications, and professional background.

Tech Stack: HTML, CSS, GitHub Pages.

Key Highlights: Developed a mobile-responsive portfolio to showcase technical skills, projects, and certifications. Streamlined project documentation to demonstrate familiarity with the software development lifecycle.

EDUCATION

- **Govt. Senior Secondary School Mehal**

2016

10th

- **Govt. Senior Secondary School Mehal**

2018

12th

- **Govt. Degree College Bhoranj (Tarkwari)**

2021

Bachelor of ARTS

- **Hemvati Nandan Bahuguna Garhwal University**

2023

MBA in IT

INTERESTS

- **Data Visualization & Dashboards:** Building data dashboards and converting complex datasets into simple, clear visualizations.
- **Continuous Learning:** Engaged in self-directed learning projects involving electronics and programming to refine problem-solving and analytical skills
- **Long-Distance Driving, Traveling to New Places, Listening to Music**

ADDITIONAL INFORMATION

Work Availability: I am ready to join immediately and am highly interested in remote work opportunities.

Efficiency: Working remotely will allow me to focus better and complete my tasks with higher efficiency within the set target timelines.

Leadership & Soft Skills: I possess strong soft skills and the ability to lead a team. In the future, if given the opportunity to lead, I am committed to fostering a supportive, family-like environment where team members feel comfortable, motivated, and empowered to achieve targets ahead of deadlines.
